Martin and OSA, *Warrendale, PA*
Wisconsin Wholesale Tire, *Milwaukee, WI*

Technology Firms

Binary Research International, *Glendale, WI*
MTM Technologies, *Arlington Heights, IL*
Panatrack, Inc., *Delafield, WI*
RampRate Inc., *San Francisco, CA*
True Process, *Mequon, WI*

Company Profile

Type: Healthcare / Fortune 500

User Environment: 300,000+

Division: GE Healthcare

Position: Senior Systems Engineer

Corporate Summary

General Electric is a worldwide Fortune 500 corporation which specializes in the research and development of products including, but not limited to, medical devices, aviation systems, consumer electronics, rail systems, security systems, and power generation equipment. GE Healthcare is a division of GE which focuses on the research and development of advanced medical systems to be used in the healthcare, government, and academic industries.

Activities Performed in Position

- Brenton J.W. Blawat’s primary focus in this position was to analyze and transition the server 2003 Active Directory environment to a server 2008 R2 environment with SQL 2008 x64.
- Brenton exhaustively critiqued the existing security mechanisms GE had in place with Active Directory and implemented new security provisions to adhere to new regulations mandated by the Department of Defense and other worldwide corporations.
- Brenton created advanced PowerShell scripts to parse XML files through dot notation, obtain a CNAME or distinguished name of an Active Directory object, secure strings using Rijndael managed cryptology, and execute SQL queries.

- Brenton provided training on scripting languages to GE Employees to leverage GUI automation provided by AutoIT V3 scripting.
- Brenton provided the Bangalore Team direct guidance on the implementation of a VMware Infrastructure server to consolidate testing equipment.
- Brenton performed an advanced RAID recovery to restore critical files that were deleted by an accidental operating system reinstallation.

Technologies Utilized in Position

Software

- Autolt v3
- VMware Infrastructure

Hardware Devices

- Hewlett Packard DL Series G3, G4, and G5

Microsoft Technologies

- 2003/2008 Active Directory
- Windows Server 2008 x64
- SQL Server 2008 x64
- VB script
- PowerShell v2.0
- .NET Framework 3.0
- C#

Company Profile

Type: Academic / High School

User Environment: 770+

Server Environment: 8+

Position: Senior Systems Engineer

Corporate Summary

Divine Savior Holy Angels High School (DSHA), is a private Catholic all girls school that focuses on developing their students to be believers, critical thinkers, communicators, and leaders. DSHA High Schools provides a unique learning environment enabling their students to grow personally, spiritually, and intellectually.

Activities Performed in Position

- Brenton was initially consulted to correct major issues within the DSHA network.
- Brenton removed the DC, DHCP, and DNS role from a legacy 2000 server, and transitioned to the new primary and secondary 2008 servers.
- Brenton redefined the DHCP Scopes to ensure optimal usage of the subnets.
- Brenton implemented and allocated an additional 16GB of RAM on the ESX Server to increase system availability by 100%.

- Brenton enabled and configured Exchange 2007 Transport Rules to provide email profanity message rejection and redirection to the administration.
- Brenton reset the password on Cisco 2800 Router to provide DSHA access into the device.
- Reconfigured the NAS iSCSI to provide full 10GB connectivity to the ESXi server.
- Brenton provided a detailed Technology Audit for the executive team to review the existing and future infrastructure.

Technologies Implemented in Position

untangle® Firewall/Border Appliance

- Advanced Spam Filtering
- Port Forwarding Rules for multiple IPs
- Spyware/Phishing Filtering
- WAN Balancing for Fiber/dual T1 connections
- Advanced Web Filtering Rules
- Border Virus Detection & Removal

Network Redesign

- Transitioned to Windows 2008 DC Services
- Transitioned to Windows 2008 DHCP Services
- Fully Migrated Exchange 2003 to 2007
- Removed all NT4 Servers.

Microsoft Exchange 2007

- Enabled Exchange 2007 for inbound and outbound SMTP.
- Transport Hub Rule Configurations
- Default Global Address List Schema Change
- Enabled Offline Address Book Generation.

ALEXIAN BROTHERS HOSPITAL NETWORK

Company Profile

Type: Hospital / N.P.O.

User Environment: 5000+

Server Environment: 300+

Position: Senior Systems Engineer

Corporate Summary

Alexian Brothers Hospital Network is a Not-For-Profit Organization comprising of four hospitals in the Chicago-land area. Providing services for two million residents, Alexian Brothers Hospital Network pride themselves in neuroscience specializations and has achieved multiple American Stroke Association awards in commensuration.

Activities Performed in Position

- Brenton J.W. Blawat was consulted to perform a 400+ mobile device software upgrade for the hospital system.
- Brenton designed and implemented a wireless network for the new four floor hospital bed tower.
- Brenton designed and implemented the Wyse Device Manager and Wyse Embedded Images.
- Brenton reconfigured the existing 2008 Active Directory GPOs.
- Brenton managed a team to configure and inventory 700 mobile devices.
- Brenton hired and managed a team of eight to remove a worm infection off of 4500+ PCs.
- Directly interfaced with Senior Director of IT to provide updates on all project statuses.

Technologies Implemented in Position

Software

- Wyse Device Manager Infrastructure
- Avalanche Mobility Center
- Meditech Point of Care
- Iatric Systems MobiLab
- Citrix Mobile Client
- AutoIT Automation Scripting

Hardware Devices

- Cisco Wireless Controller System (2)
- Cisco Aeronet 1200 (120)
- Wyse Terminals (200+)
- Symbol PPT8846 Devices (400+)
- Zebra QL220+ Mobile Printers (300+)

Microsoft Technologies

- 2008 Group Policy Objects
- 2008 AD Replication (8 DCs)
- C# Compact Framework
- Pocket PC 2003 Scripting
- Windows XP Embedded (Wyse)

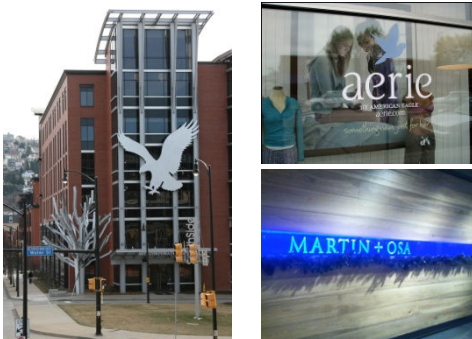

Company Profile

Type: Retail / Public: AEO

User Environment: 37,000+

Server Environment: 2000+

Position: Windows Infrastructure Consultant

Corporate Summary

American Eagle Outfitters (AEO) Corporation is a retail organization that owns four brands; American Eagle Outfitters; Aerie; 77kids; and Martin and Osa. Known for their trendy clothing, AEO Corporation targets age groups 2-10, 15-25, and 28-40. - Provided training curriculum and courses for the internal staff to ensure AEO was able to update the device remotely.

Technologies Implemented in Position

Software

- VMWare ESX Infrastructure
- Wavelink Avalanche Mobility Center

Hardware Devices

- Fujitsu IPAD (2200+)
- Cisco Aeronet 1200 (4000+)

Other Technologies

- Wi-Fi Protected Access-Passkey
- Temporal Key Integrity Protocol
- Post-GRE Databases
- Windows CE 4.2
- C++ Debugging of Avalanche Agent

Company Profile

Type: Non Profit Organization

User Environment: 30+

Server Environment: 2+

Position: Senior Systems Engineer

Corporate Summary

Ronald McDonald House Charities of Eastern Wisconsin provides relieve for families who have children that have sickness and/or illness. With a wide variety of services ranging from fantasy rooms to extended stay, Ronald McDonald House Charities provides the home-away-from-home environment for those families who really need it.

Activities Performed in Position

- Ronald McDonald House consulted Brenton Blawat to install the Untangle Border Appliance and remediate issues on their network.
- Brenton created custom User-Specific VB network login scripts to map private directories for the required Users.
- All of the network drives were remapped to standardized directories for the entire facility.
- Provided port forwarding and advanced network support for the Brainfire Media.
- The network layout was inspected and documented with items for remediation.

Technologies Implemented in Position

- Enabled External Use of Public IP
- Port Forwarding Rules
- Advanced Web Filtering Rules
- Border Virus Detection / Removal

Network Redesign

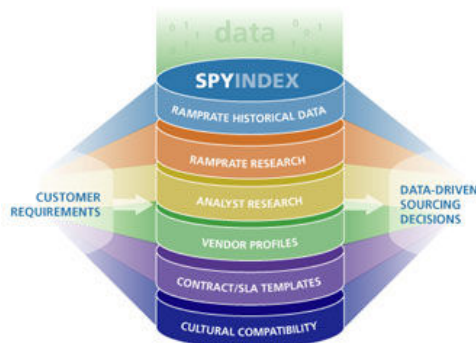

- User-Specific VB Network Login Scripts
- Reconfiguration of all Network Drives
- Enabled Microsoft DHCP Services
- Enabled Microsoft DNS Services
- Active Directory OU restructuring

Company Profile

Type: Technology Firm

Client Environment: 300+

Position: Senior Data Analyst / Developer

Corporate Summary

RampRate is an advisory and strategic research organization which provides its' clients extensive analysis for the procurement of IT data services. RampRate has a proprietary database (SPYINDEX™), which generates a baseline for IT sourcing costs. Depending on sourcing requirements, the SPYINDEX™ generates metrics that enable RampRate to place their clients within cost percentiles. RampRate reduces their clients' costs with proprietary data combined with existing relationships with data centers worldwide.

Activities Performed in Position

- RampRate consulted Brenton Blawat to provide data migration services for their SPYINDEX™.
- Brenton Blawat implemented a process to ensure all data in their SPYINDEX™ was in a standardized format.
- Created a Microsoft Silverlight to provide data verification services for the SPYINDEX™.

Technologies Implemented in Position

Silverlight Application

- Convert Power Metrics to/from:
 - Kilowatts Breakered
 - Kilowatt Hours (Average)
 - AC Amps (110v)
 - AC Amps (100v 3 Phase)
 - AC Amps (200v)
 - AC Amps (200v 3 Phase)
 - DC Amps (48v)
- Convert Space Metrics to/from:
 - Square Feet
 - Square Meters
 - Racks
 - Kilowatts Peak
- Application parsed conversion formulas visual representation of how the data was derived.
- Application derived monthly reoccurring costs for the individual power and space metrics.

Company Profile

Type: Food Manufacturer / Public SENEBC

User Environment: 2000+

Server Environment: 100+

Position Held: Senior Network Engineer

Corporate Summary

Seneca Foods Incorporated is the world's largest canned foods manufacturer and distributor. While Seneca Foods has its own brands including READ; Festal; Libby's; Green Gaint; Aunt Nellie's; and Stokely's; they manufacture and private label for organizations such as Sysco Foods Corporation. Little known by the public, Seneca Foods Incorporated owns the largest freezer to the West of the Mississippi scaling 400,000+ square feet.

Activities Performed in Position

- Seneca Foods consulted Brenton Blawat to architect the infrastructure for a multi-million dollar warehouse management system.
- Brenton coordinated the installation of 300+ Access points in 25 million square feet of warehouse.
- Brenton provisioned 600+ Motorola mobile devices for use with the new network infrastructure.
- Brenton implemented freezer rated enclosures to increase ambient temperatures for access point utilization in a -56°F freezer.
- Brenton was the project manager for Venture Connect Cabling Corporation to implement the network infrastructure.
- Brenton provided detailed network layout, and spread spectrum diagrams for all of their plants and warehouses.

Technologies Implemented in Position

Networking Infrastructure

- Wavelink Mobile Manager
- HP Procurve Layer 2 Switches
- Symbol AP-4131 Access Points (300+)
- Symbol MC-9050 / MC-9060 Handhelds (300+)

Wireless Site Assessment Tools

- AirMagnet Site Survey Pro
- Kismet (parameter sniffing)
- Oronoco Classic Gold PCMCIA Card

Special Freezer Equipment

- Outdoor CAT6 Gel Filled
- L-com SubZero Enclosure
